**Subject:** Your students can use Mathematica after graduation

As the current semester draws to a close, I wanted to remind you of an offer available to your students that you can forward along.

Many students will graduate and start their careers utilizing the skills they have learned during their time on campus. Since Mathematica is used at Fortune 500 companies and government research labs throughout the world, having access to Mathematica on campus has helped prepare them to take on professional challenges that require these skills.

So they can take Mathematica with them to their first job, we offer recent graduates the chance to upgrade from Mathematica for Students to the professional version of Mathematica--with one year of Premier Service included--at an 80% discount off of the commercial list price.

Students who are interested can email [info@wolfram.com](mailto:info@wolfram.com) or order by phone at 1-800-WOLFRAM (965-3726).

Thank you for taking the time to pass this on to your students. Their Mathematica experience will help them stand out from other job applicants and give them the opportunity to put the skills you have taught them to work.

Sincerely,

Katherine Bautista  
Academic Program Manager
