

Positions in Quantitative Finance ITG, Financial Engineering

\$ £ ¥ €

Summer 2009 Internships and Full-Time Opportunities:

There are summer intern and full-time job opportunities available at ITG, an agency brokerage company. Financial Engineering is ITG's research and development department. Graduate students that are interested in spending a summer with us working in the areas of

- portfolio construction,
- pre-trade decision making,
- trading processes and
- post-trade evaluation

should contact us *AS SOON AS POSSIBLE*. Positions will be filled in Boston and New York.

Requirements for both summer intern and full-time positions are the same. Candidates must demonstrate strong quantitative skills (probability, statistics, optimization *etc.*), have good personality and work well with others, possess a knowledge of Unix, R/Splus and either C, C++ or Matlab, and must enjoy programming and working with large datasets

This is the third year that we have run this our internship program, and we have had great success in the past. Each year summer interns who evidence superior performance become candidates for a permanent position within Financial Engineering.
