Finish reading the book, *The Goal*. Write a book review* (2-3 pages) that includes answers to the following questions:

1. Give three management lessons that you learned from the book.
2. Consider some of the subjects that we discussed in class, e.g. performance measurements, benchmarking, JIT production techniques, etc. Did Al Rogo utilize any of these techniques in his quest for a solution to his problems? Give examples.
3. Would you recommend that your classmates/co-workers read this book?

*In your review ignore the fact that it is a bad example of a novel. However, comment upon the use of a novel to deliver information such as in this case, *factory management*. Do you believe that this “candy coating” helps or is demeaning?
